- 2 x audible/visual water alarms.

The AquaTechnica housing is a totally customised underwater housing, designed to work on TV commercials, drama and other productions requiring high quality, underwater images. Along with the camera and housing, FilmCanaryIslands SL can provide experienced underwater technicians, safety teams and underwater communication systems for film & TV productions. Our services are available world-wide or you can make use of our fantastic underwater locations here in the Canary Islands.

For Further information, please contact our underwater specialist, Andy McLeod. Tel +34 620 002 297 or andy@filmcanaryislands.com
